projects

Gotchi bb | [GitHub](#) + [Site](#) | React, Express, CSS, Heroku

A full-stack app that allows users to care for a virtual pet.

- Remotely mob and pair programmed with a team of 4 in a two week sprint.
- Tested functionality using Jest and Supertest.
- Built reusable components and created functionality to edit virtual pet.

Foto | [GitHub](#) + [Site](#) | React, Supabase, Node, Netlify

A photo app that allows users to create public and private albums.

- Remotely mob and pair programmed with a team of 3 in a 5 day sprint.
- Strategically organized file structure to maintain navigable code.
- Created functionality to upload photos into an album.

Unspoken | [GitHub](#) + [Site](#) | React, JS, Postgres, Netlify

An online blog that remains anonymous for you to share unsaid stories or unspoken words with a lo-fi vibe.

- Took the lead in CSS and added music to our app
- Wrote the presentational components and refactored for cleaner code.
